OK Charlita,

Here is what I am wondering: Can you investigate whether you can alter Figures 2 and 3 so that, i) they can be oriented in portrait orientation, and ii) combined into one figure? I am doing similar work now with maps, but there is lots to do.

Here is why I would like to do this: It would be much more conducive to including the figure in a journal article. If this could be done, our chances of journal acceptance could be way higher.

Some thoughts on how this might be possible with help from a NERL graphics contractor: i) remove all headers, ii) remove numbers from x axes, except for the bottom axis, iii) instead of showing structures, just structures in the chromatogram of the complete molecule and then formulae for the fragments in the mass spectra, iv) increase font size of numbers, structures and formulae, v) other ideas??.

You could tell me what things you would like me to send you, e.g., new molecular structures with bigger fonts, or new chromatograms and spectra.

Also, you could review what I have written so far, but I have a long way to go. Especially check my evaluation of whether there might be sequence isomers.

If this doesn't sound like something you want to try, I will get back to it later. If you want to give it a shot, I can send you the Powerpoint file which is closer to the original.

Thanks,
John

Hey John,

Still waiting for the work you mentioned for me to do.

Charlita

Hey Charlita,

See Tammy's email. Is this in the process of undergoing purchase? Feel free to communicate with Tammy directly.

John

Hi John,

Happy Friday!

I wanted to reach out to you as I was not sure if you guys ended up going forward to the updated UNIFI computer and software? I know we talked about Waters offering an additional PC if you needed one. Let me know where you guys are and what I can be doing to help.
